

I'm not robot!

Compatible with a variety of devices, the Leviton Vizia + 24 Hour Programmable Timer (120VAC) allows you to schedule On/Off times for almost any type of wired load. The Leviton VPT24-1PZ 24-hour programmable timer switch can store up to 50 On/Off events for one day or any combination of days, such as Monday through Friday. It supports incandescents up to 1800W, resistive/inductive loads up to 15A, and motor loads up to 1 HP/120VAC, 60Hz. It's perfect for indoor/outdoor lighting, fans, pool filters and more.Program all days, weekdays, weekends or any combination of daysAstronomical clock automatically adjusts to local sunrise/sunset timesTimer settings at a glance with large, back-lit displayAutomatic daylight savings time optionRechargeable battery keeps time during temporary power outagesSuitable for multi-way switch applicationsWhite faceplate installed. Light Almond and Ivory color change kits included.The timer on the Leviton VPT24-1PZ 24-hour programmable timer switch is easy to program. Its backlit LCD display features menu-driven programming that can be controlled with the quoteMenuquote, quoteSetquote, and arrow buttons right below. The timer operates in one of two modes: Pro or Standard. Standard mode is used for simple applications, while Pro mode allows you to create a more complex automated On/Off schedule. "Pro Mode" provides up to 50 On/Off events for any day or combination of days, at your selected times or at self-adjusting Sunup and Sundown times. In Pro Mode, self-adjusting Daylight Savings Time and random modes are also available. "Standard Mode" provides up to three On/Off events for Monday through Sunday, Monday through Friday, or Saturday through Sunday at your selected times only. Self-adjusting Sunup/Sundown and Daylight Savings Time are not available in Standard Mode.The Leviton VPT24-1PZ 24-Hour Programmable Timer Switch can be used in 3-way or more applications. When using a remote switch with the timer, you can activate the timer's temporary override or permanent override. The timer installs in a standard box, and requires a neutral wire. It comes with a white faceplate installed. Light almond and ivory color change kits are included.NOTE: Wallplate not included on the Leviton VPT24-1PZ 24-hour programmable timer switch.Leviton Vizia + Lighting ControlsLevoton's Vizia + lighting controls offer an elegant, return-to-neutral design for the ultimate in visual and tactile appeal. Digital technology adds precise control with features such as fade on/ fade off, selectable fade rates and LED timeout options. The eco-friendly energy save mode allows the user to decrease the maximum brightness level to reduce energy and extend bulb life. Vizia + lighting controls are compatible with Leviton's legendary Decora devices and screwless snap-on wallplates. WARNINGS AND CAUTIONS : • To be installed and/or used in accordance with appropriate electrical codes and regulations. • If you are unsure about any part of these instructions, consult an electrician. • vizia +™ electronic switches are not compatible with standard 3-way or 4-way switches. They must be used with compatible vizia +™ on/off remotes. • Recommended minimum wall box depth is 2-1/2". Tools needed to install your Timer Switch Slotted/Phillips Screwdriver Electrical Tape Pliers Pencil Cutters Ruler Changing the color of your device: Your device may include color options. To change color of the face, proceed as follows: Line up tabs and Push in side press in sides one at a tab to release a time to attach Installing your Timer Switch NOTE: Use check boxes when Steps are completed. WARNING: Step 1 TO AVOID FIRE SHOCK OR DEATH: TURN OFF POWER at circuit breaker or fuse and test that power is off before wiring! OFF ON OFF ON OFF ON OFF ON OFF ON OFF ON OFF ON OFF ON OFF ON OFF ON Identifying your wiring application (most common): Step 2 NOTE: If the wiring in your wall box does not resemble any of these configurations, consult a qualified electrician. 1 2 2 1 3 3 4 4 5 Single Pole 3-Way 1. Line (Hot) 1. Line or Load 2. Neutral (see important instruction below) 3. Ground 2. Neutral 4. Load 3. Ground 4. First Traveler – note color 5. Second Traveler – note color. NOTE: For matching remote w/LEDs installation, the First Traveler becomes Line Hot. IMPORTANT : For 3-Way applications, note that one of the screw terminals from the old switch being removed will usually be a different color (Black) or labeled Common. Tag that wire with electrical tape and identify as the common (Line or Load) in both the switch wall box and remote wall box. Single Pole (One location) or 3-Way (Multi-location) Preparing and connecting wires: Step 3 Pull off pre-cut insulation from timer leads. Make sure that the ends of the wires from the wall box are straight (cut if necessary). Remove insulation from each wire in the wall box as shown. Strip Gage 5/8" (measure bare (1.6 cm) wire here) Cut (if necessary) For non-standard wiring applications, refer to Wire Nut and Conductor Size Chart WIRE NUT / # OF CONDUCTOR COMBINATION CHART 1- #12 w/ 1 to 3 #14, #16 or #18 2- #12 w/ 1 or 2 #16 or #18 1- #14 w/ 1 to 4 #16 or #18 2- #14 w/ 1 to 3 #16 or #18 • Make sure that the ends of the wires from the wall box are straight (cut if necessary). • Remove insulation from each wire in the wall box as shown. • For Single-Pole Application, go to Step 4a. • For 3-Way Coordinating Remote (no LEDs) Application, go to Step 4b. • For 3-Way Matching Remote (with LEDs) Application, go to Step 4c. Single Pole Wiring Application: Step 4a Black 1 White 2 Red 4 3 Green Yellow/Red Insulating label: This wire is used in 3-way installations only. For single pole installations, do not remove insulating label. Timer Switch Hot (Black) WH BK YL/RD Line RD Black 120VAC, 60Hz Use lead for 3-Way or more Load applications only. For single Green pole applications, do not White Ground remove the insulating label. Neutral (White) WIRING TIMER SWITCH: Connect wires per WIRING DIAGRAM as follows: • Green or bare copper wire in wall box to timer switch Green lead. • Line Hot wall box wire to timer switch Black lead. • Load wall box wire to timer switch Red lead. • Line Neutral wall box wire to timer switch White lead. • NOTE: If label is missing place electrical tape around the timer switch Yellow/Red lead. Ensure no strands are exposed. • Proceed to Step 5. Digital Timer Switch Cat. No. VPT24-1P, Lighted Incandescent-1800W – Resistive/Inductive-15A – Motor-1 HP 120VAC, 60Hz INSTALLATION INSTRUCTIONS WARNINGS AND CAUTIONS • Use only one (1) vizia + digital timer switch in a multi-location circuit with up to 9 coordinating remote switches (without LEDs) or up to 4 matching remote switches (with LEDs). TM • Maximum wire length from digital timer switch to all installed remotes cannot exceed 300 ft (90 m). • Disconnect power at circuit breaker or fuse when servicing, installing or removing fixture. • Use this device with copper or copper clad wire only. 3-Way Wiring with Coordinating Remote Switch, Step 4b VPOSR-10, (no LED) Application: Coordinating Remote Switch Timer Switch Terminal Screw marked Black White (WH) WH BK White 1 2 2 Yellow/ 1 Red 5 3 4 Red 5 4 Green Terminal 3 Screw marked Yellow/Red (YL/RD) Timer Switch Coordinating Remote Switch (no LED) Hot (Black) WH BK WH BK (unused) Black YL/RD Green Ground Line Load RD RD YL/RD 120VAC, 60Hz (unused) White Green Ground Neutral (White) WIRING TIMER SWITCH: Connect wires per WIRING DIAGRAM as follows: NOTE: The timer switch must be installed in a wall box that has a Line Hot connection. NOTE: Maximum wire length from timer switch to all installed remotes cannot exceed 300 ft (90 m). • Green or bare copper wire in wall box to timer switch Green lead. • Line Hot (common) wall box wire identified (tagged) when removing old switch to timer switch Black lead. • First Traveler wall box wire to timer switch Red lead (note wire color). • Second Traveler wall box wire to the Yellow/Red lead (note wire color). This traveler from the timer switch must go to the terminal screw on the remote marked "YL/RD". • Line Neutral wall box wire to timer switch White lead. WIRING COORDINATING REMOTE SWITCH (VPOSR-10): Connect wires per WIRING DIAGRAM as follows: NOTE: "BK" and "RD" terminals on coordinating remote switch are unused. Tighten both screws. NOTE: Maximum wire length from timer switch to last remote cannot exceed 300 ft (90 m). • Green or bare copper wire in wall box to Green terminal screw. • Load wall box wire identified (tagged) when removing old switch to First Traveler (note color as above). • Second Traveler wall box wire (note color as above) to terminal screw marked "YL/RD". This traveler from the remote must go to the Yellow/ Red lead on the timer switch. • Remove White insulating label from terminal screw marked "WH". • Line Neutral wall box wire to terminal screw marked "WH". • Proceed to Step 5. 3-Way Wiring with Matching Remote Switch, Step 4c VPOSR-1L, (w/LED) Application: Matching Remote Switch Timer Switch Additional Neutral Wire Black 2 BK WH White 1 1 2 Yellow/4 Red 5 3 Red 4 5 Green 3 Matching Remote Switch (w/LED) Timer Switch Hot (Black) WH WH BK BK Black Green Ground Ground RD YL/RD Line YL/RD Load 120VAC, 60Hz White Neutral (White) NOTE: The timer switch must be installed in a wall box that has a Load connection. The matching remote must be installed in a wall box with a Line Hot connection and a Neutral connection. A Neutral wire to the matching remote needs to be added as shown. If you are unsure about any part of these instructions, consult an electrician. NOTE: Maximum wire length from dimmer to all installed remotes cannot exceed 300 ft (90 m). WIRING MATCHING REMOTE SWITCH, VPOSR-1L (wall box with Line Hot connection): Connect wires per WIRING DIAGRAM as follows: • Green or bare copper wire in wall box to Green terminal screw. • Line Hot (common) wall box wire identified (tagged) when removing old switch and First Traveler to remote terminal screw marked "BK". • Second Traveler wall box wire from switch to remote terminal screw marked "YL/RD" (note wire color). This traveler from the remote must go to the Yellow/Red lead on the timer switch. • Line Neutral wall box wire to remote terminal screw marked "WH". WIRING TIMER SWITCH (wall box with Load connection): Connect wires per WIRING DIAGRAM as follows: • Green or bare copper wire in wall box to timer switch Green lead. • Load wall box wire identified (tagged) when removing old switch to timer switch Red lead. • First Traveler Line Hot to timer switch Black lead. • Remove Red insulating label from Yellow/Red lead. • Second Traveler wall box wire (note color as above) to timer switch Yellow/Red lead. This traveler from the switch must go to the terminal screw on the remote marked "YL/RD". • Line Neutral wall box wire to timer switch White lead. • Proceed to Step 5. DI-000-VPT24-02B Testing your Switch prior to mounting in Step 5 wall box: • Position all wires to provide room in outlet wall box for device. • Ensure that the word "TOP" is facing up on device strap. • Partially screw in mounting screws in wall box mounting holes. NOTE: Dress wires with a bend as shown in diagram in order to relieve stress when mounting device. • Restore power at circuit breaker or fuse. • Wait until or time is displayed on the screen. • Press pad until locator light is OFF. Load should turn ON. If loads do not turn ON, refer to the TROUBLESHOOTING section. Switch Mounting: Step 6 TURN OFF POWER AT CIRCUIT BREAKER OR FUSE. • Installation may now be completed by tightening mounting screws into wall box. Attach wallplate. Restore Power: Step 7 Restore power at circuit breaker or fuse. Installation is complete. NOTE: The Digital Timer Switch is equipped with an internal rechargeable battery back-up to keep programmed settings in the event of a power interruption.
